Summary

Tech enthusiast with a can-do attitude, aiming to leverage well-honed skills to develop state-of-the-art, scalable software solutions. Passionate problem solver and dedicated Software Engineer, proficient in ReactJs, Python, Django, AWS, JavaScript, HTML, and CSS, committed to delivering efficient and robust applications.

Work Experience

Brudite Private Limited   *Jaipur*
FULL STACK DEVELOPER   *Dec. 2023 - April. 2024*

- Utilized Agile methodologies and Scrum ceremonies for enhanced project collaboration. Leveraged JIRA for project management and Git/GitHub for seamless code integration.
- Developed frontend applications using ReactJs with Tailwind and Bootstrap for UI enhancement.Proficient in AWS services like IAM, EC2, and S3 for cloud-based infrastructure management.
- Implemented Python/Django web applications with Django REST Framework for RESTful APIs. Executed CI/CD pipelines for automated software delivery and utilized Docker for streamlined deployment and consistent development environments.

Projects

Skill Recognition Platform | Reactjs, Python, Aws, Django, Git
INTERNAL PRODUCT

- Created a skill recognition platform awarding badges based on predefined criteria. Utilized Django Rest Framework for secure authentication and authorization. Users access personalized profiles showcasing badges and skills to colleagues and managers.

TimeSheet - Standup Tracking App | Reactjs, Python, Aws, Django, Git
INTERNAL PRODUCT

- Created an internal solution streamlining time tracking, daily standups, and project management. Enabled efficient recording and tracking of standup meetings, including voice input functionality for updates. Weekly summaries provided managers with insights for decision-making and resource allocation. Time tracking features allowed effective logging of task and project durations

Skills

Languages	Python, Javascript, HTML, CSS
Library	Reactjs
DevOps	AWS, Docker, Jenkins
Framework	Tailwind, Django, Bootstrap
Database	SQL, Mysql
Other	Vs-code, Git, Postman

Self-Projects

TopFit - All About Gym | HTML, CSS , Javascript, Bootstrap
SELF LEARNING

- Crafted a gym website with HTML, CSS, and JavaScript showcasing offerings and facilities. Included an offer carousel, trainer profiles, and training programs for a comprehensive user experience. Developed a BMI calculator enabling users to input basic information and calculate their Body Mass Index

Digital News | Reactjs, Bootstrap, Javascript, HTML, CSS
SELF LEARNING

- Created a news website offering global updates in business, entertainment, health, science, sports, and technology. Integrated News API, authenticated with unique keys, to fetch data in JSON format. Implemented Infinite Scroll akin to YouTube for seamless article loading while scrolling. Designed user-friendly interface for easy access to latest news across diverse categories.

Strengths

Team Work , Quick Learner, Leadership, Problem Solving , Communication
